I am sorry for not being clear. Please **REFER** any new odor complaints to ADEQ and forward any existing open odor complaints. To be clear, ADEQ will handle dust complaints regarding the fertilizer process until we receive further clarification back from ADEQ. We will only be handling construction dust complaints and routine inspections or the equipment listed under their existing permit. We will not be working to resolve any complaints or issues with the fertilizer processing unit at this time.

This raises a question as follows: Jo states, "All odor complaints regarding Hickmans will go to ADEQ from now on anyway and I would continue to forward the processing unit dust complaints as they come in to ADEQ."

Does this mean the odor complaint issue has been settled and I should REFER the open complaints to ADEQ, or merely FORWARD them as Jo states we will be doing with the dust from the processing unit?

Sincerely,

Shannon Klimek

No. I think the Director and Assistant Director, who will be making the contacts to resolve the jurisdiction question, are heavily involved in prepping for a stakeholder process on developing a response to EPA's Clean Power Plan due October 16th. All odor complaints regarding Hickmans will go to ADEQ from now on anyway and I would continue to forward the processing unit dust complaints as they come in to ADEQ. Emily has been assigned to handle the complaints. We'll just handle the currently permitted equipment and construction dust until we hear back from ADEQ.

We are continuing to get complaints about Hickman's. Do we have any information from ADEQ on the status and what they are doing?
Thanks
